General Rules

- 1 Any attempt of infecting another member will result in a permanent ban. This counts for malware, viruses, backdoors and also the linking to a phishing site.
- 2 We respect everyone's privacy. Posting any personal information of other members are not allowed. (Login data, passwords, email, IP, home address, IM accounts, in-game nicknames, doxes, etc).
- 3 Any adult (mature rated) images, links, and the exchange of those contents are forbidden. These can only be posted in the NSFW forums and must be tagged with a [NSFW] tag.
- 4 When advertising, do it in the proper section; advertising in your avatar, signature, usertitle, username & private message(s) are not allowed! Same goes for any attachment uploaded to RaidForums.
- 5 Survey links for downloads, etc. are not allowed, there will be no exceptions, even in the future.
- 6 It's okay to share your opinion; however, if there is something you disagree on, keep your sanity and use adult like manner to create a thread. Failing to do so will result in removal of your thread and having your forum privileges removed.

- 8 Reporting posts without a good reason will result in a warning or ban.
- 9 No posting of links which refer to adf.ly or any other URL-shortening sites. Always use a direct link. Why? It's annoying and you don't earn shit with it anyways, remember that.

Hi everyone,

If you're looking to trade, buy or sell your databases, then this thread is for you!
Please keep in mind that this forum is only for trading, buying and selling, if you would like to request a database for free, then please visit this thread: <https://raidforums.com/Thread-Database-Requests-26049>

Please read the following before making a post on this forum:

◆ If the number of databases that you want to trade/buy/sell exceeds 5, then please use an online pastebin, such as Ghostbin, Ybin, 0bin or Hastebin, to upload your list of databases. Another option is to use to [spoiler][/spoiler] tags and write your databases in between.

◆ Don't spam the forum by creating new threads every time you edit your database-list. Instead, go back to your original post, edit it and replace your old link of databases with your new one. If you're unable to edit your thread, please contact a staff-member and we will edit it in for you.

◆ Be careful when dealing with people, there are a lot of scammers and other type of shady people out there. Always use an escrow/middleman if necessary.

Once you have read the above steps, please post your thread by using the following template:

Thread Prefix: Make sure to select SELLING or BUYING or TRADING.
Introduction: TEXT HERE - Should describe if you want to trade, sell or/and buy databases, if you have any price you're looking for and so on. Keep it short!

THIS DOMAIN HAS BEEN SEIZED

The domain for

RAID FORUMS

has been seized by the Federal Bureau of Investigation, the United States Secret Service, and the Department of Justice in accordance with a seizure warrant issued pursuant to 18 U.S.C. §§ 981, 982, inter alia, by the United States District Court for the Eastern District of Virginia as part of law enforcement action taken in parallel with Europol's Joint Cybercrime Action Task Force, the United Kingdom's National Crime Agency, the Swedish Police Authority, the Romanian National Police, the Internal Revenue Service Criminal Investigation and other international law enforcement partners.

First and foremost, I want to express gratitude to every one of you who has reached out to me, bearing messages of goodwill and support. Some have even contacted me daily and kept friendly chatter flowing, I thank you for this much needed distraction. To those of you offering this outpouring of support—you know who you are—I thank you from the bottom of my heart.

Secondly, I feel compelled to address the situation surrounding pompompurin. I've briefly touched on this in a past message on Pastebin, but given the gravity of the matter, it warrants more than a fleeting mention here. It's come to my attention that yes, pompompurin started a website to replace RaidForums and he was quickly thereafter arrested by the FBI and is now facing charges. It pains me to learn of his alleged suicide attempt, and I want to tell him to hold on, I too have found myself in the same boat. There's a part of me that carries a burden of guilt, especially when I consider those who may feel the need to continue my legacy and later face the repercussions of doing exactly that. Regardless of this, I'd still like to thank the members of our community who've stepped up to fill the void left by RaidForums' departure, creating spaces and forums to keep the community alive.

I ask that you offer your support to those who've found themselves involved in the legal aftermath of RaidForums' activities. Your compassion is needed now more than ever. I recently came across an article by Euronews detailing the plight of one of the suspects <https://www.euronews.com/next/2023/06/02/raidforums-the-child-hacker-facing-extradition-to-the-us>, and the situation is quite bad. Moreover, I can't help but question the ethics behind some of the authorities' actions in this matter, but the USA has a long history of immoral actions so it doesn't surprise me.

...

Godspeed to you all.

51. Records received from Verizon, in turn, revealed that at least nine of the above IP addresses³ used to access the pompompurin account on RaidForums were, at the time, associated with the following mobile devices registered to “Conor Fitzpatrick” at the UNION PREMISES with a cell phone number ending in 3144 (“the 3144 Verizon Telephone Number”).

Breach Forums Return to Clearnet and Dark Web Despite FBI Seizure

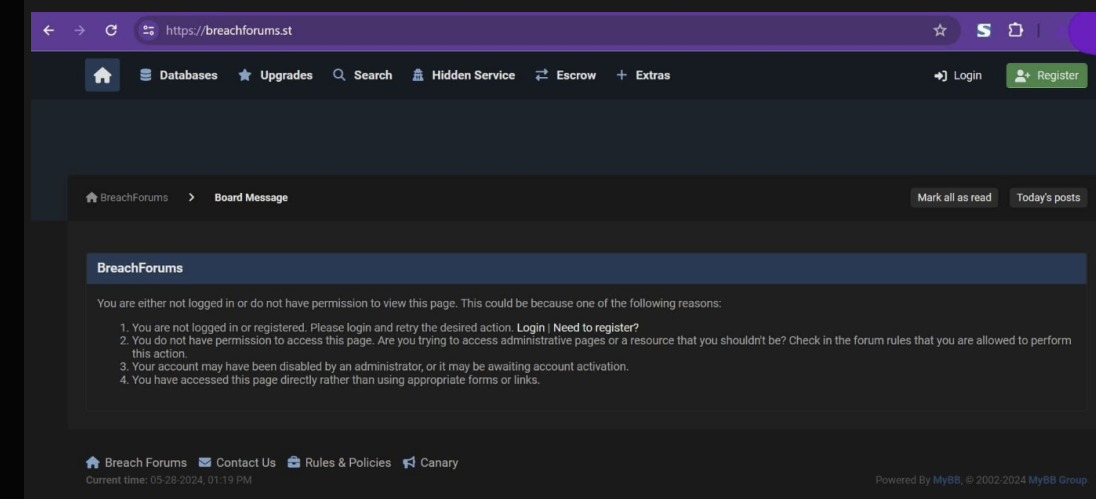

A tale of emerging cybercrime and embarrassment for the world's premier law enforcement agency.

BY WAQAS · MAY 28, 2024 · 4 MINUTE READ

Breach Forums returns to the clearnet and dark web just two weeks after the FBI seized its infrastructure and arrested two administrators. One of the admins, ShinyHunters, regained domains despite the FBI's efforts, highlighting significant operational setbacks and security lapses.

The notorious cybercrime and hacking forum, Breach Forums, has returned to the clearnet and dark web just two weeks after the FBI seized its entire infrastructure. The FBI arrested two administrators in the process.

The operation began on May 15, 2024, when the FBI seized all domains belonging to Breach Forums in a coordinated international effort. The next day, Hackread.com published an exclusive report revealing how ShinyHunters, the hacker and main administrator of Breach Forums, managed to regain the seized domain from right under the nose of the FBI by contacting the Hong Kong-based domain registrar, NiceNIC.

Indeed, from in or about August 2024 through in or about January 2025, "IntelBroker" was identified on Forum-1 as the site's "owner." To further his username's notoriety, WEST has associated different images with IntelBroker but primarily uses the following image as his calling card:

On March 15, the FBI took down the website BreachForums, the **online hub** of illicit activity used to expose the D.C. Health Link data, and arrested its alleged founder. While I acknowledge the D.C. Health Benefit Exchange Authority's commitment to protecting the data of customers from another breach, the fact of the matter is that the information of more than 56,000 people has been compromised, putting their physical safety and financial security at some risk. These individuals join hundreds of millions of Americans who have had their data stolen in the past year alone, and data breaches are only going to grow in scope.
